

BFM® Kevlar cover

An outside cover to reinforce a standard BFM® fitting against continuous or intermittent inside pressure. The Kevlar cover prevents the Seeflex material from stretching out and eventually bursting.

The Kevlar cover is attached to the outside of the BFM® spigot with butterfly screws – hence tool free – and can be removed easily at any time to check or replace the BFM® fitting underneath.

Technical properties:

Material	Kevlar (aramid); woven
Colour	yellow
Temperature resistance	260°C, peaks 300°C
Weight	460 g/m ²
Permeability	0
Surface resistance	10E10 Ohm
Use in Atex Zones (exterior; interior irrelevant as no contact)	Grounding of the metal rings recommended; for use in gas-ex zones individual measurements may be required.

This document does not imply any legally binding assurance concerning specific properties of the BFM® fittings or the suitability for a particular application. The responsibility of complying with any governing laws and regulations relevant to the use of BFM® fittings is the obligation of the user. Subject to technical changes without prior notice. BFM® is a registered trademark of BFM Global Ltd.
