

BFM® for special applications

Blind caps / collecting bags

BFM® blind cap:

Snapped into the existing BFM® spigot instead of the BFM® connector, the blind cap then closes off the pipe end / container air- and dust-tight like a lid. Available in all standard diameters starting from 100 mm. Length: approx. 35 mm. To be used for example

- To close off containers or machinery parts during temporary production breaks
- As a lid during cleaning (cleaning tools can be connected to the cap)
- As a secure wet / dry separation during CIP processes
- Viewing window
- Maintenance opening / sample taking

BFM® collecting bag:

May be snapped into the existing BFM® spigot to collect small amount of product e.g. after sifters or metal detectors. Available in all standard diameters starting from 100 mm. Length: 100 mm up, in 50 mm increments.

Both caps and collecting bags are available in Seeflex 040E and 040AS as well as the various fabrics.

This document does not imply any legally binding assurance concerning specific properties of the BFM® fittings or the suitability for a particular application. The responsibility of complying with any governing laws and regulations relevant to the use of BFM® fittings is the obligation of the user. Subject to technical changes without prior notice. BFM® is a registered trademark of BFM Global Ltd.
